

Coffee filter shamrocks and flowers

Needed:
White coffee filters
Scissors
Food coloring
Cups for colors
Clear tape
Spoon for dripping
Table cover

Fold coffee filter in half, then folder over two more times. Trim and round outer corners.

Use yellow green and blue food coloring and dilute with one part coloring to 4 parts water. (The more water, the lighter the colors).

Dip corners of folder filter into the colors or try dripping the colors with a spoon. The filters are highly absorbent, so only use a little liquid.

When dry, cut the shamrocks into four sections. Take one section and fold into a stem. Use clear tape on the back to attach the stem a

For flowers, folder the filters 4-5 times and cut into different sizes and shapes. Add a cup of red food coloring and try different color combinations.

When dry, these can be collaged into 3D artwork, or taped onto windows.
